VII. Read and do（文中划出关键信息）

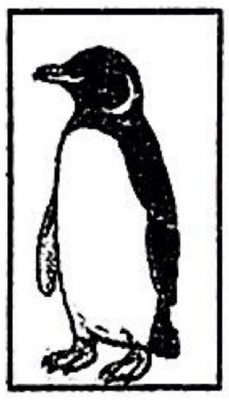

Where do animals live?

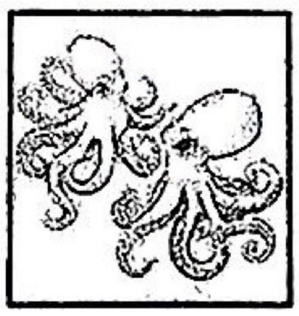

Tigers live in forests. They are big and strong. Most tigers live alone. Only mother tigers stay with their cubs. They like to find food at night. Tigers don't eat vegetables or fruit. They eat meat. They can swim very well.

Snakes like to live in dark and warm places, such as holes in the ground or under rocks. They eat small animals like mice, birds and eggs. They can't move quickly and find food when it's too cold. In winter, they **hibernate**.

Penguins live on icy land. They use their bodies to keep their eggs warm. Some penguins use pebbles to circle their eggs.

Octopuses are sea animals. They find homes in small rock holes. They eat crabs and small fish. With their long arms, they can catch food easily.
